Group 4

Klaus, Josue, Henriette, Prem
Creativity in Science

• Curiosity- link different ideas
• observation

• Time and demand – kills creativity
• Stakeholders pay for solutions, not scientific freedom
New in Science- what is new to yourself only?

• Change fields/background-platform for interdisciplinary research
• Sense something ‘new’
Best ideas in Science- methodology

- Change fields/background-platform for interdisciplinary research
- Group discussion
Most important in Science

• Hard to be specific
• Interconnected
• Fun and underlying meaning - motivation
Hypothesis- driven approach

• Depends on the aim
• Open mind - a different way
• Grant applications- norms
